

Trolley

Accessory for the Solo Rescue® Decon Washer

The **Trolley** is specially designed to fit the Solo Rescue Decon Washer. The height matches the loading height of the machine and servers for a smooth transition from trolley to machine. To save space, the dimensions of the trolley have been slimmed down to pure necessity: the Heavy Duty Basket. It is made of stainless steel and built to withstand a bit of wear and tear and rough handling in a busy washing area.

To improve the ergonomics of your work and optimize your decontamination work flow, we recommend you set up a freeflow system using two of our trolleys specially designed to be used together with the Solo Rescue decon washer.

The trolleys serve two main purposes. The first being as an extra in- and outfeed table that helps load and unload the machine, which ensures a more ergonomic working situation for the operator, as no heavy lifting or carrying is needed. The second being to help avoid recontamination by using one for contaminated gear and one for clean decontaminated gear.

Multiple Areas of Use.

The trolley has two shelves which means that even if the top shelf is occupied by a wash basket, the lower floor can still be used for loading additional equipment.

Easy To Handle.

The trolley's four robust swivel wheels rotate at 360-degrees and allows you to effortlessly push the trolley in whichever direction you want. Easily park it by putting your foot on the wheel brakes.

WARNING! RESCUE Intellitech disclaims any and all liability for any damages or injury to persons, property or otherwise resulting from (i) inaccurate or insufficient instructions by a PPE manufacturer with respect to the use of the Solo Rescue®, (ii) use of the Solo Rescue® in a way that does not correspond with the washing instructions of the relevant PPE manufacturer, or (iii) where no such instructions exist, use of the Solo Rescue® without the user contacting the PPE manufacturer to receive such instructions or information. Failure to follow these instructions can result in damage to the equipment, and the loss of warranty. Using the wrong detergent and dosing may also damage the Solo Rescue® machine and void all warranties.
